

BLOCKCHAIN: Opportunities and Challenges in Healthcare

Jody Ranck, DrPH
Consulting Analyst

CORE BELIEFS AT CHILMARK

Our team is united by a core belief that effective deployment and use of IT is essential to modernizing care delivery and ultimately improving the patient journey. We monitor trends and developments in the industry with a focus on those technologies that will be transformational to healthcare delivery.

We provide comprehensive, objective, high quality research for busy executives. It's our way to help create a more informed, future-ready market of products and customers.

TODAY'S PRESENTERS

JODY RANCK, DrPH

Consulting Analyst, Chilmark
Research
Co-chair, Healthcare
Blockchain Summit

JOHN HALAMKA, MD

International Healthcare
Innovation Professor
Harvard University, School
of Medicine

VINCE KURAITIS, JD

Principal, Better Health
Technologies, LLC
30 years healthcare experience
across 150+ organizations

AGENDA

- Blockchain Healthcare Report from Chilmark Research
- Why Blockchain Now?
- Healthcare use cases for Payers/Providers
- Overview of Vendors
- What does the Future Hold?
- Panelist Presentations:
 - > John Halamka: A Blockchain Primer with Use Cases
 - > Vince Kuraitis: Lay-of-the-Land for 21st Century Business Models

CHILMARK REPORT

BLOCKCHAIN

**OPPORTUNITIES
AND CHALLENGES
IN HEALTHCARE**

LEARN MORE

WHY BLOCKCHAIN NOW?

- Fintech and beyond
- Cryptocurrency speculation and ICOs
- Rapid growth in startup activity
- Payer and Government interest is growing
- ONC White Paper Challenge (2016), Trust Framework
- 2017-18 growth in ICOs
- Major platforms are investing

USE CASES (PAYERS/PROVIDERS)

- Master Patient Indices/Provider Networks
- Revenue Cycle Management
- Patient Data Management
- Supply Chains
- Decentralized HIEs
- Quality Measures Reporting
- Care Coordination/Document and Data sharing

OVERVIEW OF VENDORS

A Blockchain Primer with Use Cases

JOHN HALAMKA, MD

HARVARD UNIVERSITY, SCHOOL OF MEDICINE

GARTNER HYPE CYCLE FOR EMERGING TECHNOLOGIES 2017

WHAT IS BLOCKCHAIN?

BLOCKCHAIN

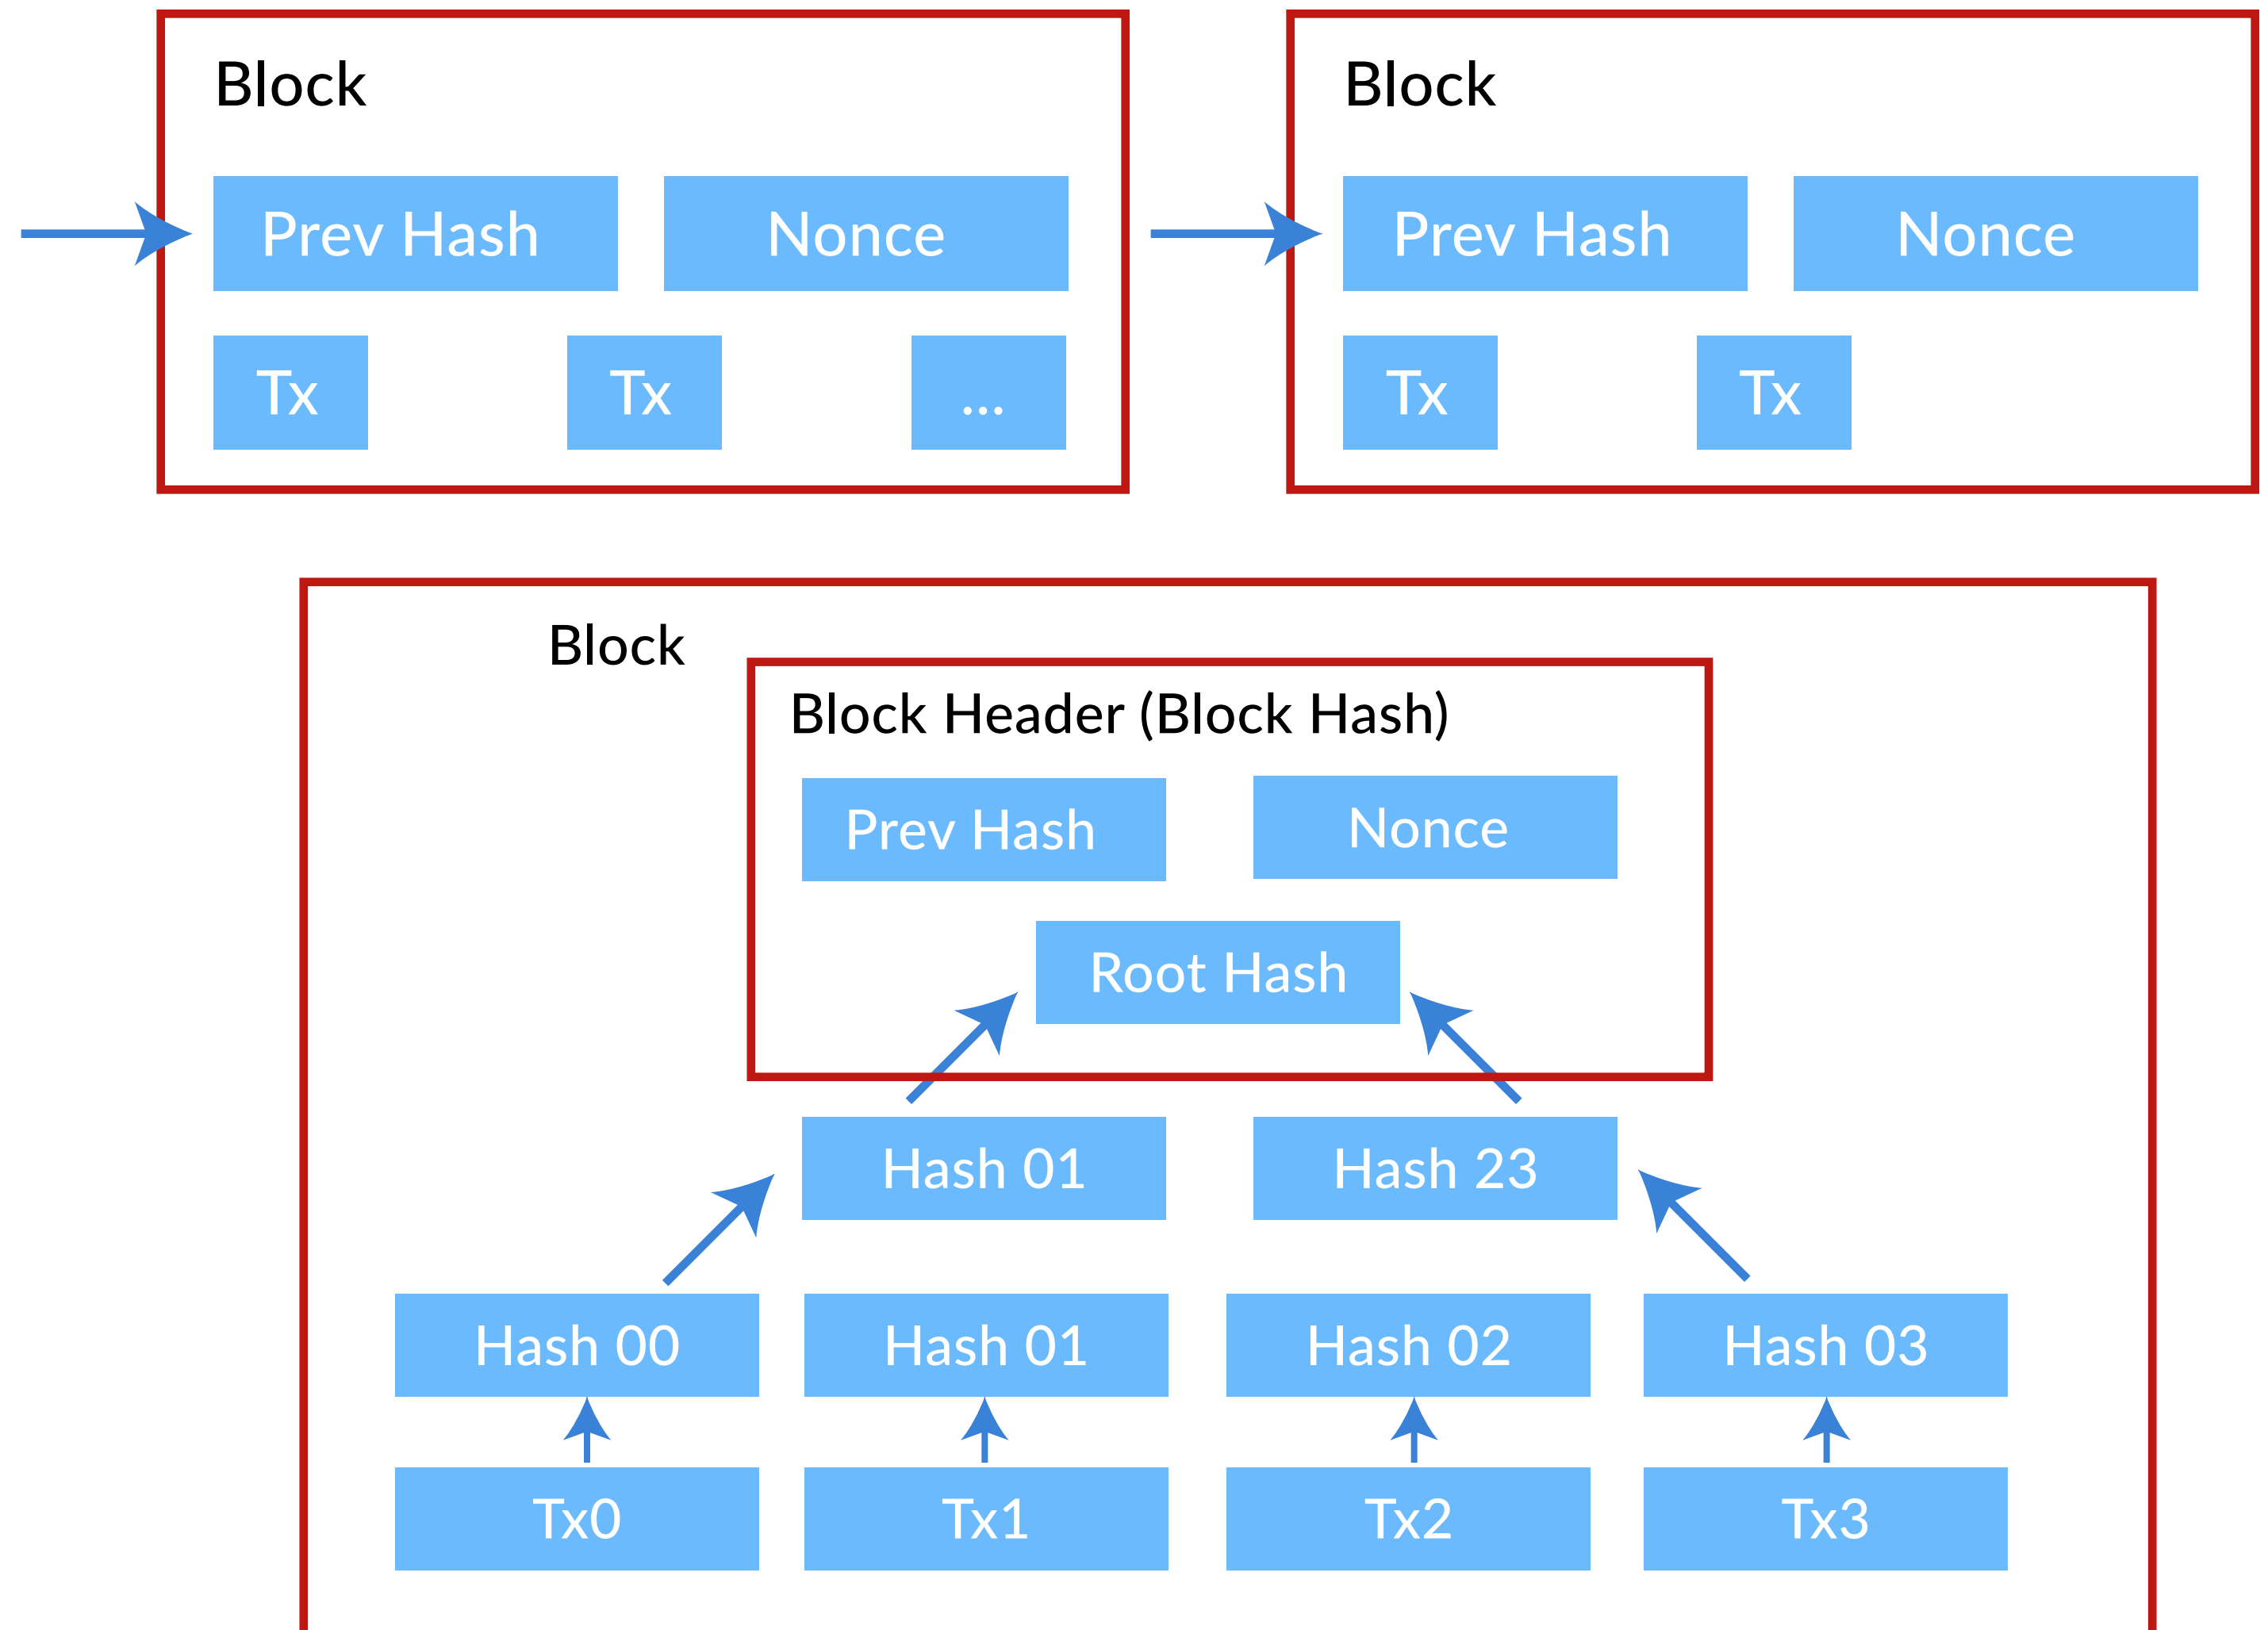

HASHING

BLOCKCHAIN REFRESHER

- Immutability, provenance and time-stamping
- A “trustless” P2P architecture, maintained by “mining” via Proof of Work hashing algorithm

Nakamoto, Satoshi, 2008. Bitcoin: A Peer-to-Peer Electronic Cash System

HARVARD/MIT BLOCKCHAIN PILOT

Unify the medication lists of the community by writing medication data to a public ledger

Evaluating the reliability of a decentralized architecture

Controlling privacy and access

Understanding costs and scalability

Enabling novel uses of data

WORK IN PROGRESS

BILL & MELINDA
GATES *foundation*

QUESTIONS?

Lay-of-the-Land for 21st Century Business Models

HIERARCHIES, PLATFORMS, CRYPTO NETWORKS

VINCE KURAITIS

BETTER HEALTH TECHNOLOGIES LLC

I. THE DECENTRALIZATION MEGATREND

***II. THE DE/CENTRALIZATION CONTINUUM:
Business Model & Network Design Options***

III. 5 IMPLICATIONS FOR PROVIDERS & PAYERS

I. THE DECENTRALIZATION MEGATREND, E.G.,

- Addressing concentration of wealth (1% vs. 99%)
- “Techlash” against platform giants, e.g., Facebook
- Cryptocurrencies without government backing
- Banking w/o banks
- Energy w/o utility companies

HEALTHCARE IS HIGHLY CENTRALIZED

EXAMPLES

- Fee-for-service payments drive activity
- Patient data not shared; viewed as proprietary asset
- Increasing consolidation
- Increasing % of employed physicians
- Price/quality opaqueness
- Culture, professional societies
- Local providers as customary default choice

WHAT WOULD A MORE DECENTRALIZED HEALTHCARE SYSTEM LOOK LIKE?

“DECENTRALIZATION” HAS MANY DEFINITIONS & MEANINGS

AS APPLIED TO BIZ MODELS

- Distribution of power, influence, value capture
- A means, not an end in and of itself

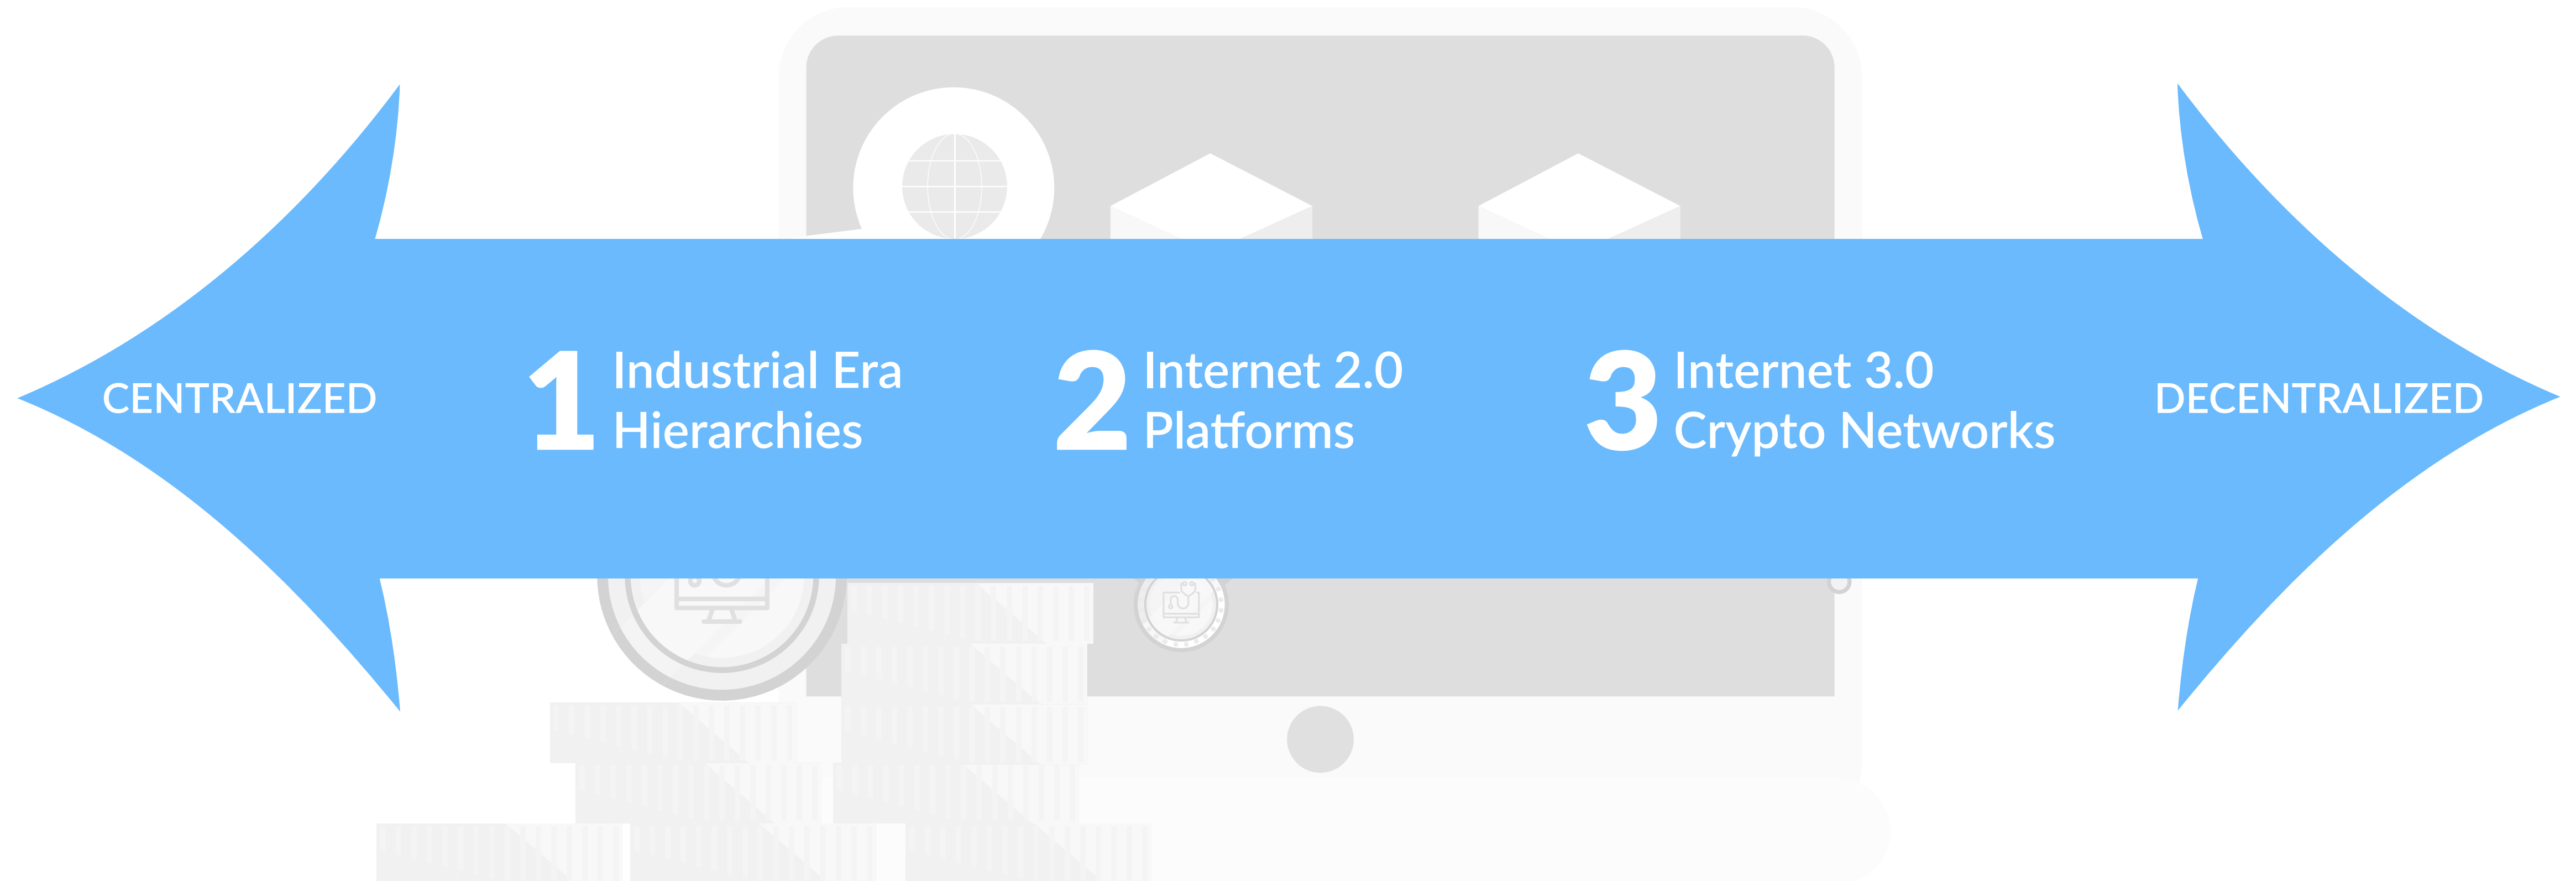

WHAT IT'S NOT

- Not just virtual care or geographic decentralization
- Doesn't imply “one” source of centralization

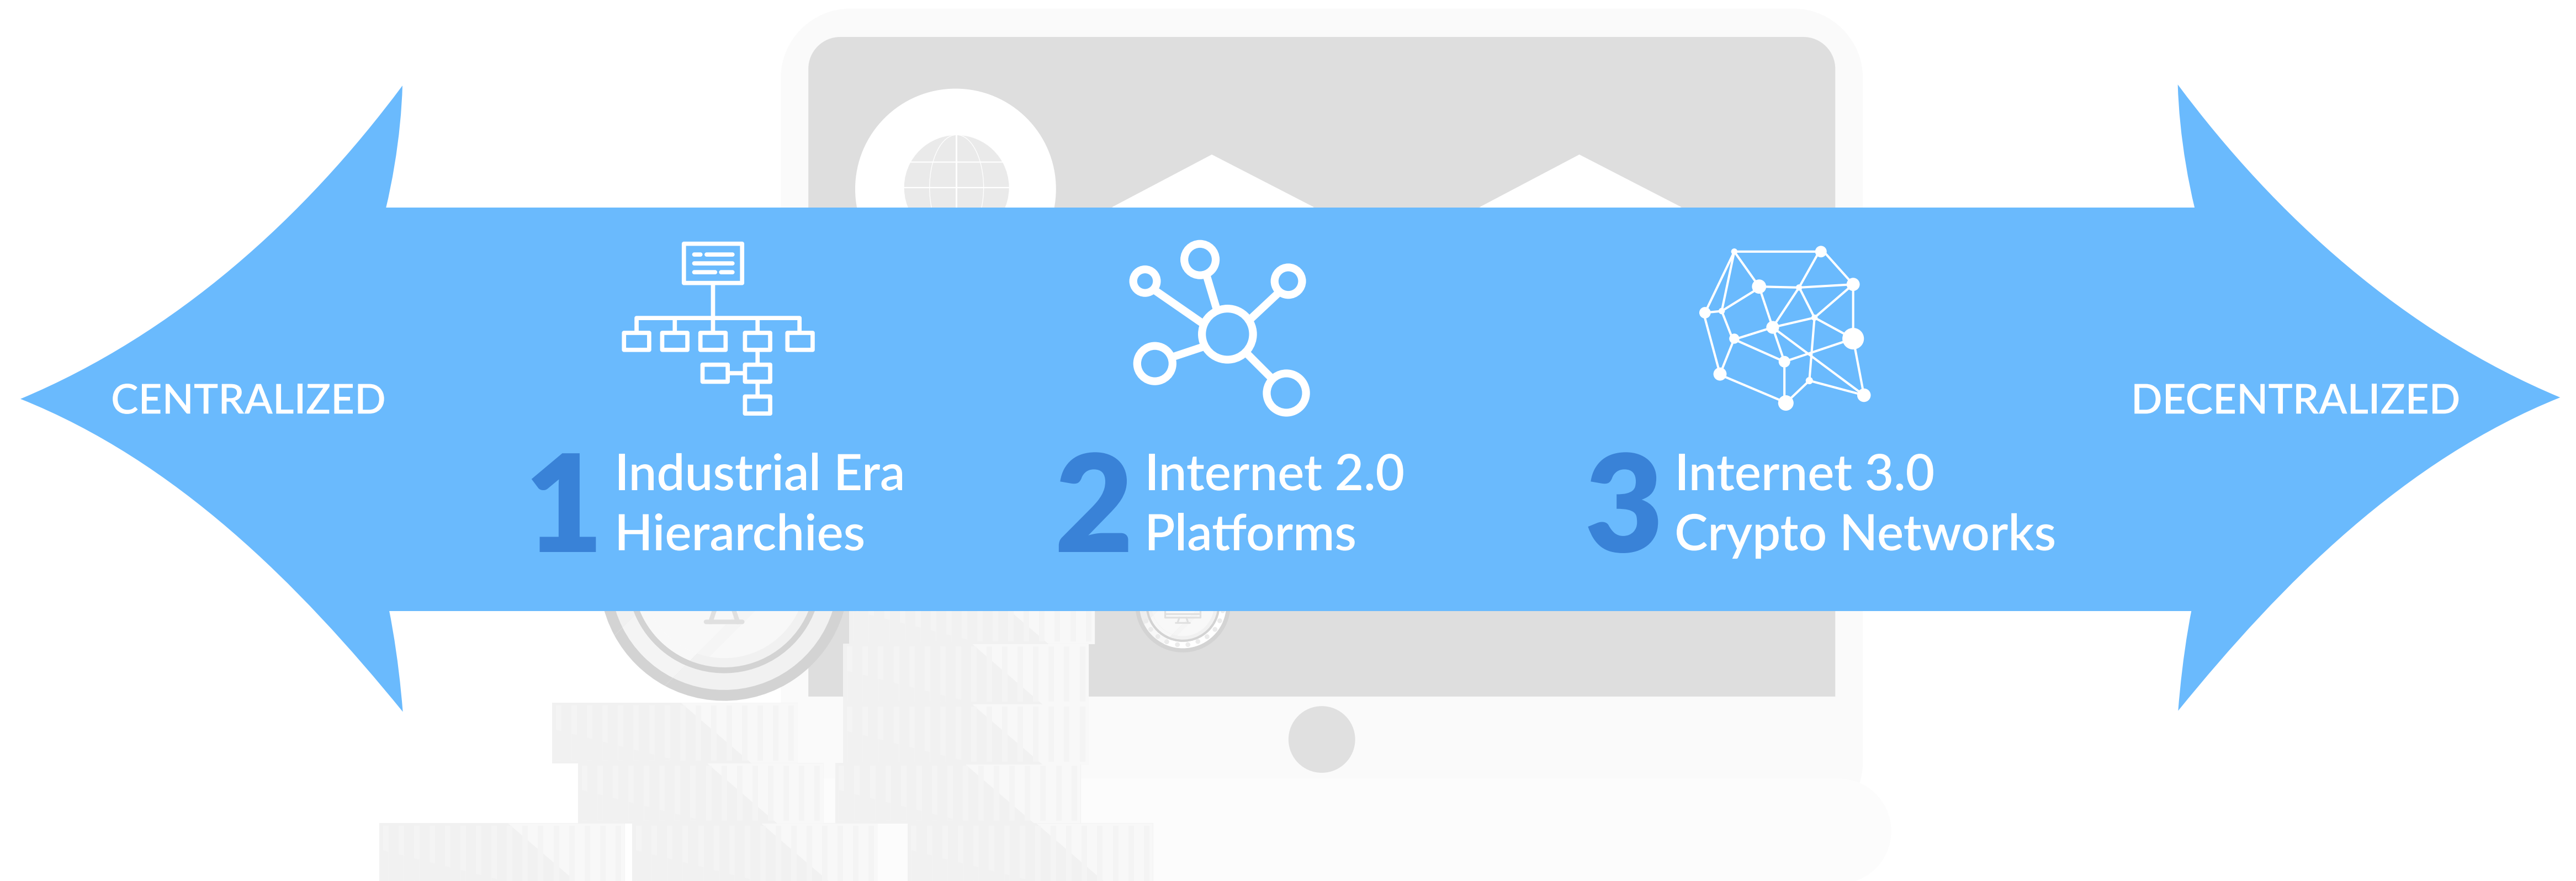

II. “THE DE/CENTRALIZATION CONTINUUM”

BUSINESS MODEL & NETWORK DESIGN OPTIONS

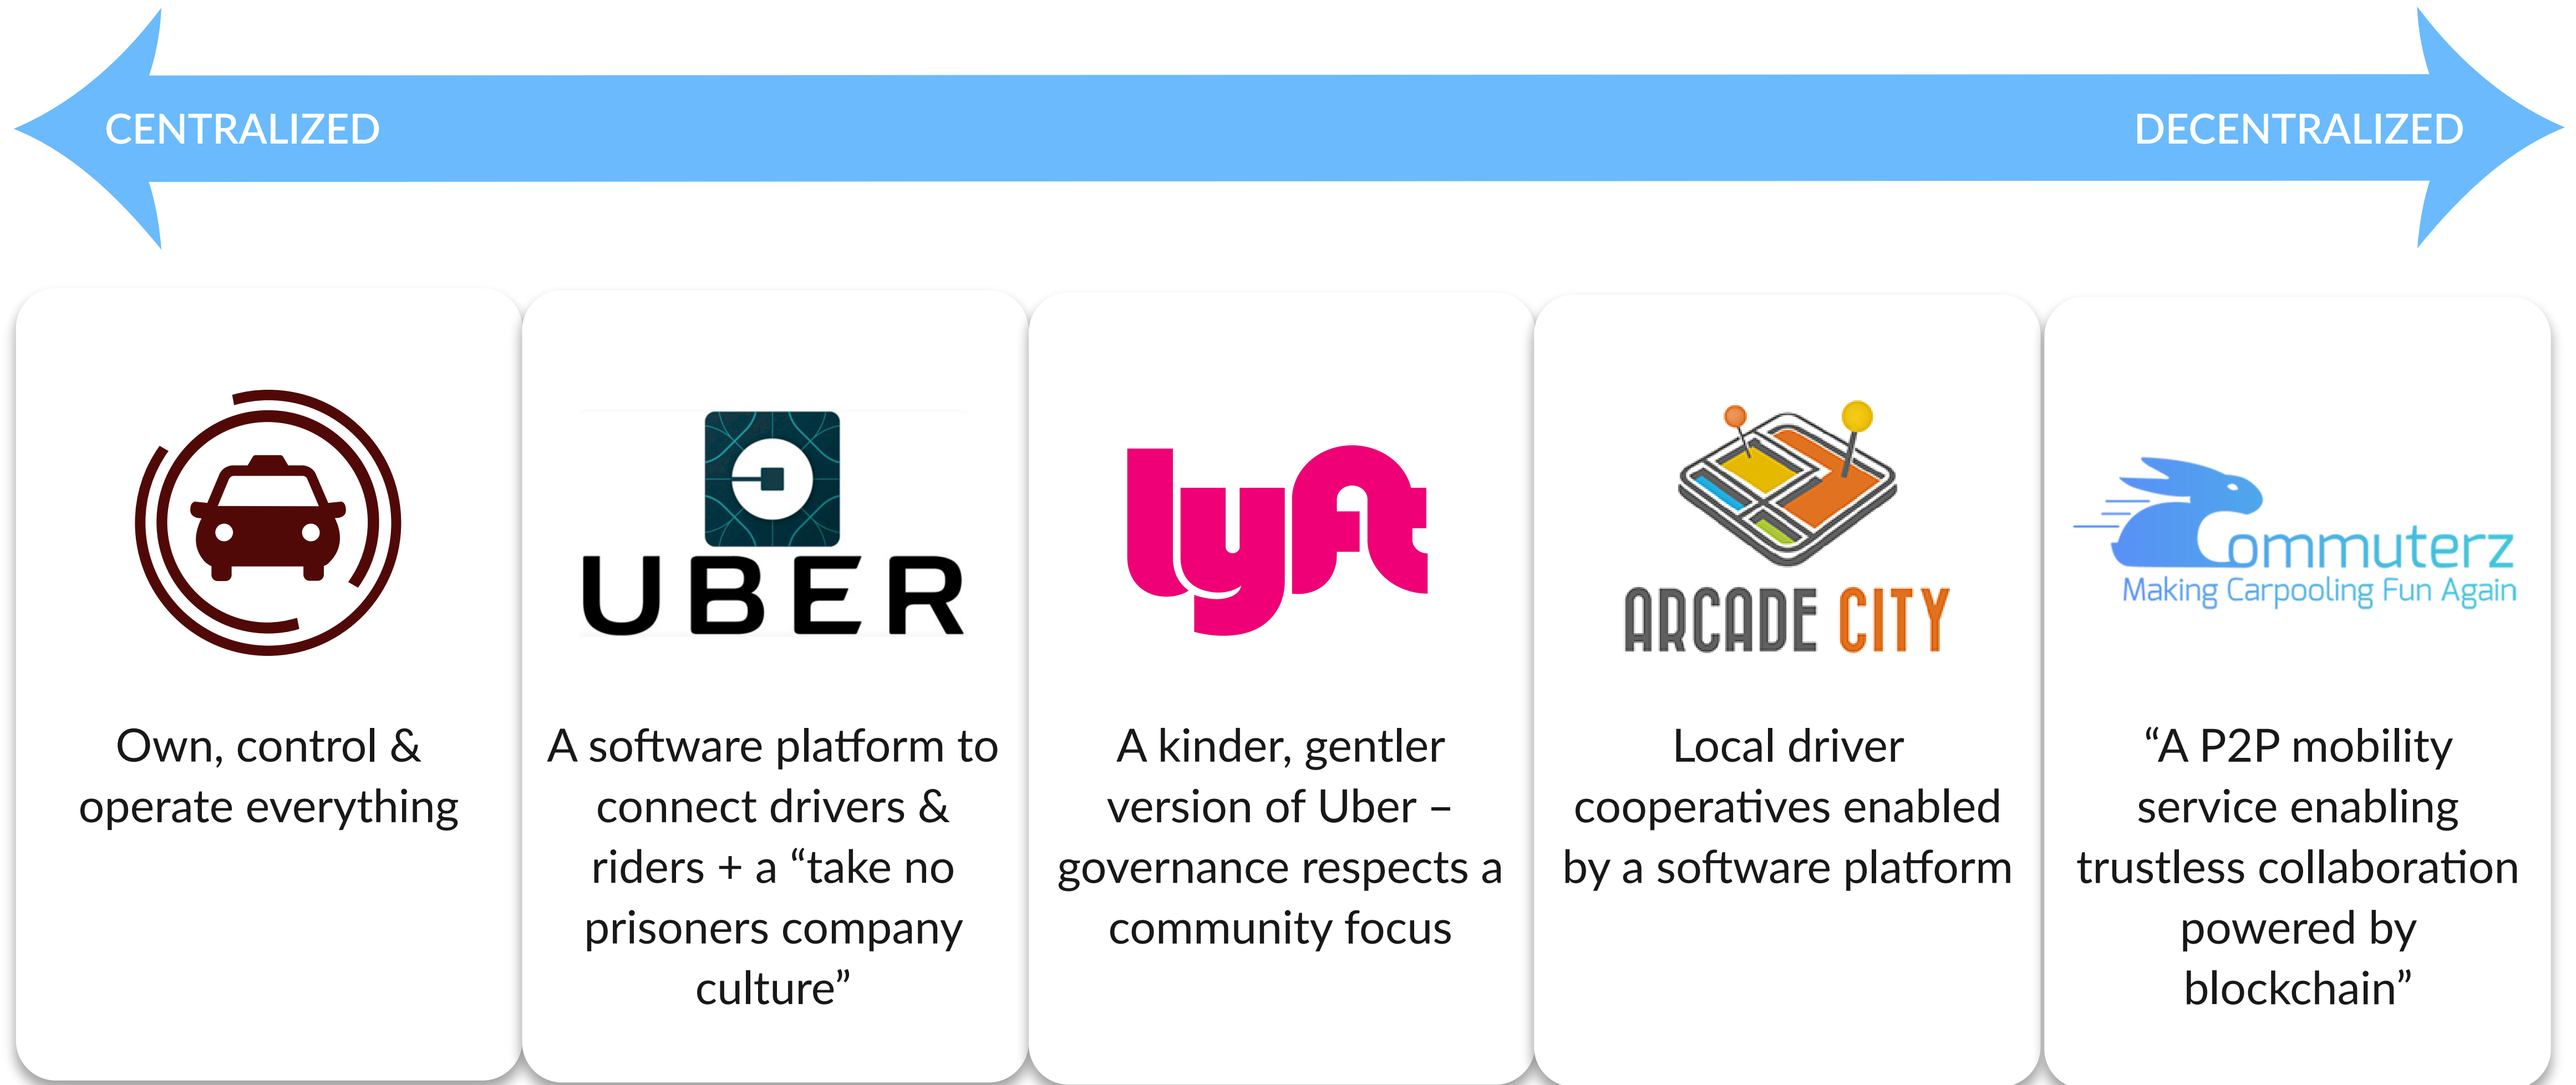

GRAPHICAL DEPICTIONS

“THE DE/CENTRALIZATION CONTINUUM”

RIDESHARING REIMAGINED

DEFINING CHARACTERISTICS

HIERARCHIES, PLATFORMS, CRYPTO NETWORKS

	CENTRALIZED	DECENTRALIZED	
	<u>Industrial Era Hierarchies</u>	<u>Internet 2.0 Platforms</u>	<u>Internet 3.0 Crypto Networks</u>
Mindset	Command and control	Orchestration	Collaboration; empower individuals & communities
Core Assets	Ownership of financial & physical capital, employees, IP, brand...	User networks, proprietary platform software	Data
Strategic Focus	Products/services	Ecosystems	New economies
Value creation	by co.	P2P and through platform capabilities	P2P
Value capture	by co.	by platform	P2P
Business Strategy Knowledge & Empiricism	Well established—100+ years of evolution	Moderately-well established—20 years of evolution	Nascent
Use of blockchain tech?	Technically possible but advantage over other tech is unclear	Yes. Focus on tactical advantages, cost, efficiency	Yes. Strategic, disruptive.
Governance	by co.	platform rules	P2P, communities; emerging
Reputation	Brand	curation, rating systems, data	P2P
Security	vulnerable central point of control	vulnerable central point of control	blockchain, consensus
Privacy			
Regulatory Frameworks	Well established	"Techlash" just beginning in U.S.; EU enacted GDPR regs effective 5/18	Largely non-existent
User data	Proprietary to co.s	Proprietary to platforms	Controlled by users
TRADEOFFS			
Control	Highest		Lowest/none
Network effects	Lowest		Highest
Coordination/Orchestration		Highest	

CHARACTERIZING CRYPTO NETWORKS

KEY COMPONENTS

Open source

Distributed

Decentralized

Automated

Tokenized

ENABLING TECHNOLOGIES

Blockchain

AI

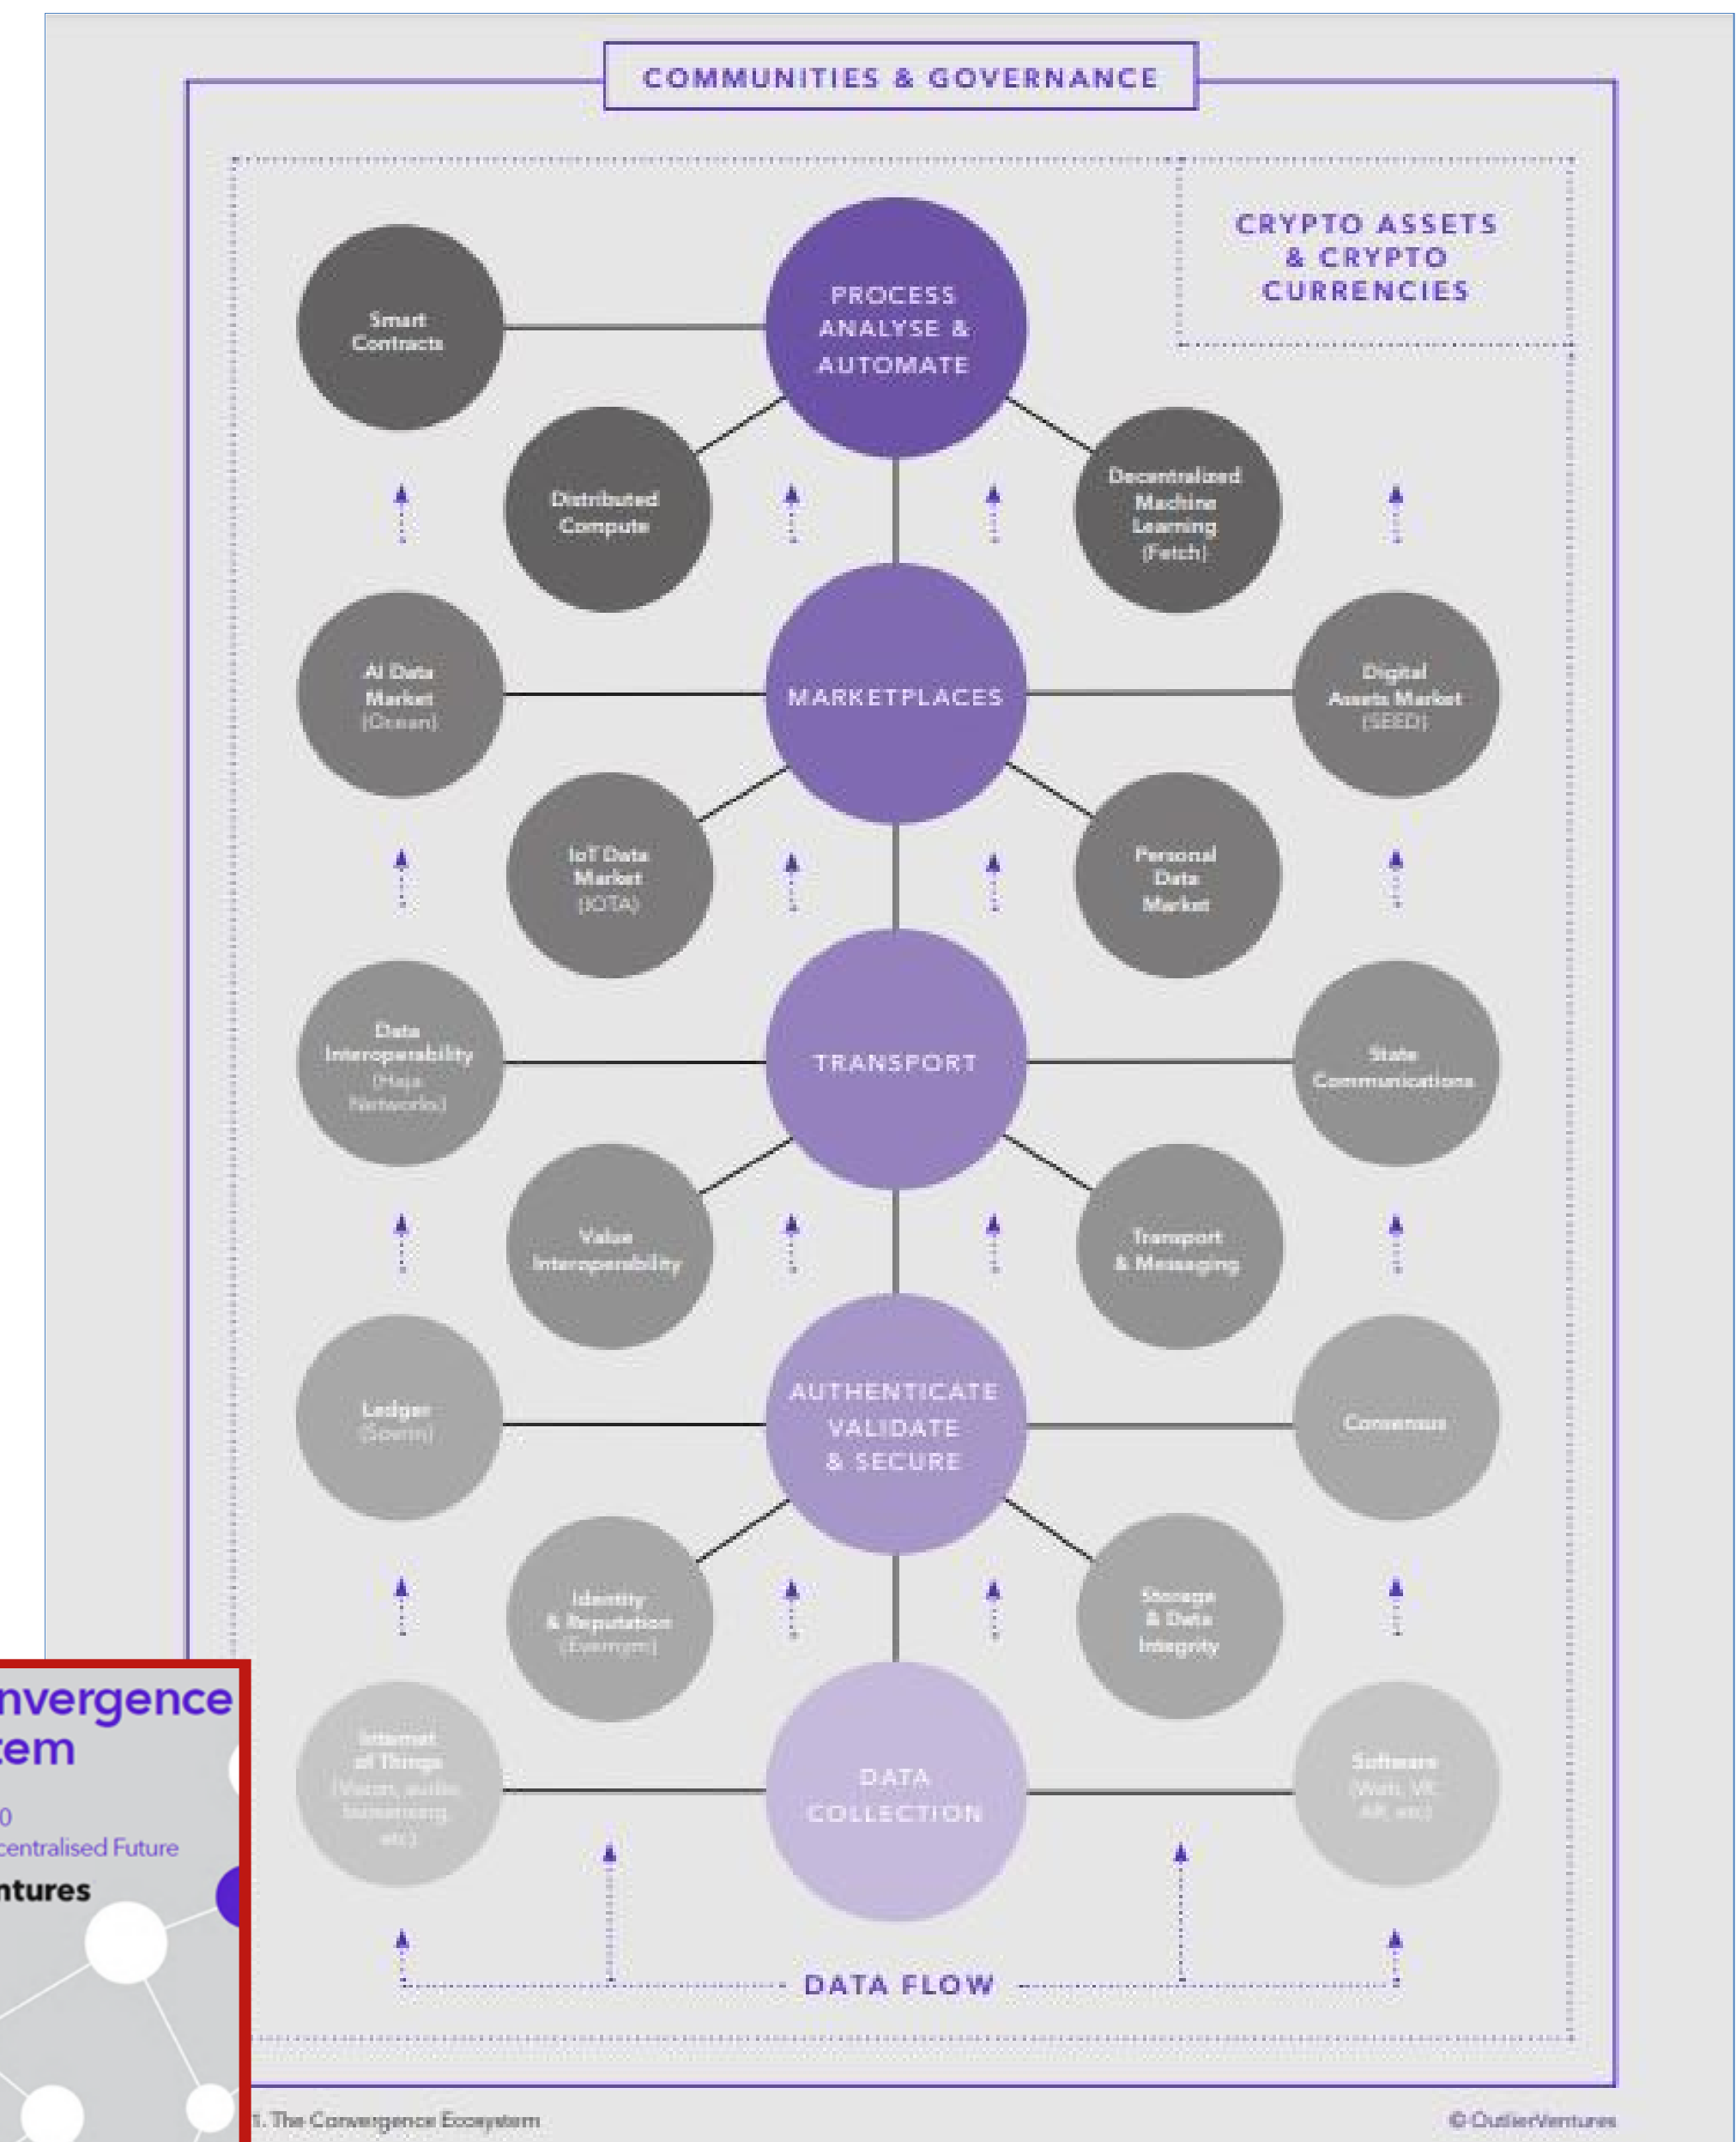

3D printing

Cloud

IoT

III. 5 IMPLICATIONS (PAYERS/PROVIDERS)

1) A NEW, COMPLEX WORLD OF BUSINESS MODELS AND STRATEGY

- All 3 categorizations will persist
- Crypto networks as uncharted design spaces
- Anticipate **MANY hybrids**

- Many new rules are counterintuitive

MANY STRATEGIES CHANGE 180°

INDUSTRIAL ERA STRATEGY

- Dominate markets through supply-side economies of scale

DIGITAL STRATEGY

- Maximize demand-size economies of scale (network effects)
- Dominate markets by orchestrating networks & ecosystems
- Reduce transaction costs

120+ HEALTHCARE ICOS IN THE WORKS

AIDOC	DentalFix	FarmaTrust	Linda Healthcare	minthealth	Simply Vital Health
Aimedis	Dentix Global	GeneBTC (scam)	Litra	mitio	SmartHealthcare
AIOM	Dermavir	Grapevine World	Longenesis	modum	Solve.Care
Ambrosus	dHealthNetwork	H+	Lumenus	MyMEDIS	SSOT Health
AMCHART	Digipharma	Hayver	Luven Diagnostic	NAM	Synthium Health
ARNA Panacea	Docademic	HealCoin	Lympo	Nano Vision	TeamMate
BlockMedx	Doc Coin	HealPoint	Mahra	Nebula Genomics	Tide
BlockRx	doc.ai	Health Monitor	MDCN	NurseToken	Timicoi
Blüpass	Earthmedz	Health Wizz	MD Tokens	NWP	trustedhealth
BowheadHealth	eCuris	HealthBase	MedCredits	OGSoft Solutions Ltd	TwinToken
BurstIQ	eHealth First	Healthcombix	MediBloc	Open Longevity	Universal Health Coin
Care4Me	ELCoin	HealthHeart	MediBond	Patientory	Veris Foundation
CareX Blockchain Platform	Elige.re	Healthureum	Medicalchain	PeerAtlas	VoxelX
Citizen Health	Embleema	Hearthy	MediChain	Potion Owl	VR MED
Clinicoin	Emrify Health Passport	Hi:Health	medicohealth	Proof.Work	WELL
CoinHealth	EncrypGen	HIT Foundation	Medicoin	Robomed Network	XMED Chain
Coral Health	Enome	Ingeniciel	Med Layer	SciCoins	Yoo-Mi PHA
Cryogen	Escobarcoin	Iryo	MedNetwork	ScriptDrop	Youthereum
CureCoin	Eterly	Kinect Hub	MedXchange	Shivom	Zealeum
DeepRadiology	Etheal	LenusChain	MEXC	Skychain	Zenome
Dentacoin					

Crypto networks will be the organizing mechanism and economic model of the next generation internet.

Ali Yahya,
VC at @a16z

2) TO HEALTHCARE INCUMBENTS

“YOU MUST DECENTRALIZE YOUR BUSINESS MODEL”

IRRESISTIBLE FORCES DRIVE DECENTRALIZATION

- 1 From volume to value
- 2 Digitization and HIT interop
- 3 Democratization/consumerization of healthcare & data

3) OPTIMIZE CENTRALIZATION VS. DECENTRALIZATION

- A few industries/use cases do require maximal decentralization
- Healthcare isn't one of them.
- Reframing the Debate About Decentralization
 - FROM: *Maximizing* decentralization
 - TO: *Optimizing* centralization vs. decentralization
- Tradeoffs--Centralization has advantages

4) FOR MOST INCUMBENTS, DECENTRALIZATION VIA PLATFORMS WILL MAKE MORE SENSE

- Add platform components incrementally
- Doesn't require abandoning existing (hierarchical) business model
- Less of a cultural leap
- Lower risk – 20 years of platform learning

5) PUTTING HEALTHCARE BLOCKCHAINS INTO PERSPECTIVE

- Blockchain can be deployed across the De/Centralization Continuum
- A powerful (essential?) network building tool

A TL;DR SUMMARY

- Blockchains are the tail, not the dog.
- The dog is the effort to decentralize ALL industries – including healthcare – over the next decade.

The background of the entire image is a grayscale photograph of a group of people at a summit. In the foreground, several individuals are holding large award signs. The signs on the left and right read "discover BLOCKCHAIN TECHNOLOGY CODE-A-TION THIRD PLACE" and "SECOND PLACE" respectively, and feature a Bitcoin logo. The sign in the center reads "FIRST PLACE" and features an Ethereum logo. The people are dressed in business casual attire. In the upper right corner, a banner partially shows the text "SUMMIT 2018".

THE 2ND ANNUAL HEALTHCARE BLOCKCHAIN SUMMIT

BOSTON, JUNE 11-12, 2018
